THE SUSTAINABLE SPA	
Smart Technology	68

A modern interior space featuring a large skylight with a grid pattern, glass shower enclosures, and a patterned rug. The room is bright and airy, with light streaming in from the skylight. The design is clean and minimalist, with a focus on natural textures and clean lines.

Soul Collection is about natural-inspired cladding, peculiar textures that are soft to the touch, as well as striking colours and beautiful design. Clean-cut shapes, easy use and installation are its distinctive traits. The most authentic essence of wellness is brought to life in this collection.

Cristiano Mino

Soul Collection

Colour impressions and contemporary design

Soul Collection has a **distinctively contemporary** style that reshapes the Nordic tradition of wellness, offering a unique atmosphere with charming colours.

This collection was developed with the goal to allow people to **customise their experience** through our Wellness products featuring elegant, warm and embracing colours.

Its clean-cut lines, natural-inspire cladding and **colour options** make it perfect for any environment; it merges seamlessly with the surrounding space, turning into functional décor.

Soul Sauna

The delight of heat,
the charm of colours

Learn more about Soul Sauna

SOUL SAUNA

Soul Sauna

WARM WELL-BEING

Soul Sauna transports the charm of the Nordic culture in a product characterised by **very contemporary design** and urban style.

An exclusive place **customisable with unique colours:** sophisticated shades that blend in the environment and offer a multi-sensory experience.

Because psycho-physical well-being also involves the link between different states of mind and different colour shades.

Wellness at its best

Attention to details, essential appearance, colours, fragrances and natural-inspired materials that are soft to the touch make the sauna experience even more remarkable.

BENEFITS

Soul Sauna features the intense heat and atmosphere of the Finnish sauna, with a temperature of 80-90°C and humidity rate of 10-20% which make it ideal to relax muscles and train the cardiocirculatory system. Also available in the Soft Sauna version, characterised by a mild heat, for a gentle and embracing wellness experience.

RITUALS

Thanks to the oven, it is possible to perform an Aufguss ritual which enhances the beneficial effects of heat. Essential oils may be used as a paramount element in wellness rituals and combined with sprayed water, for an immediate sensation of freshness.

LIGHTING

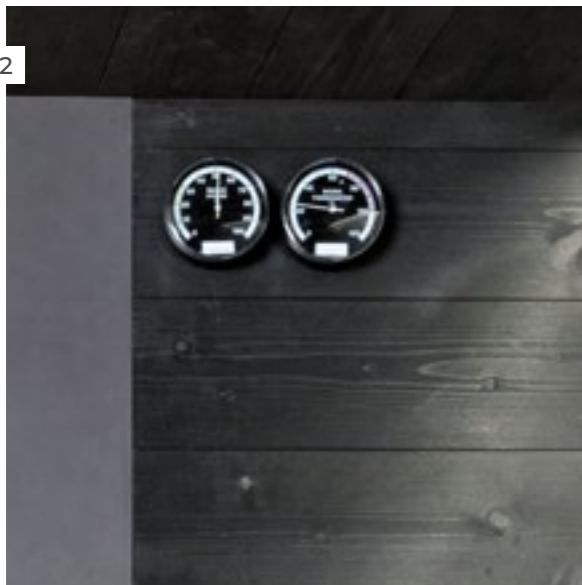

An embracing beam of indirect light that brightens the interior in wood, enhancing its purity. A diffused blaze that evokes the original lighting of saunas, when sun rays shone through the small windows nested in the walls.

COMBI OPTION

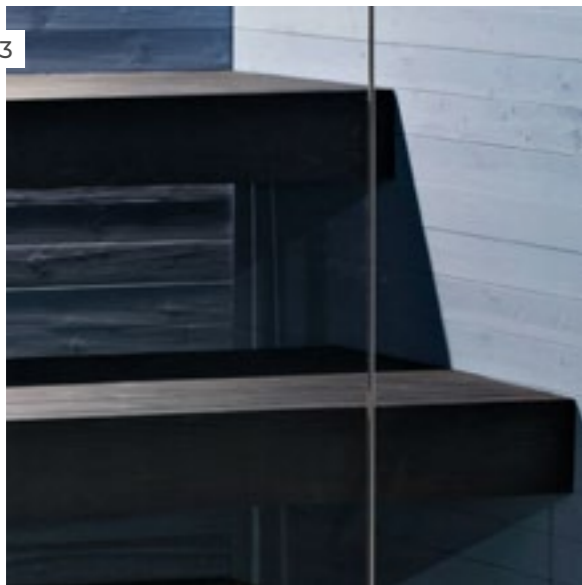

The "Combi" option includes and combines, in one environment, the traditional oven typical of the Finnish sauna and the infra-red lamps, which warm up the body through the ergonomic seat.

1- The "Combi" option combines the oven of the Finnish sauna and the infra-red lamps.

2- Thermometer and hygrometer, ideal to monitor the temperature and humidity inside Soul Sauna.

3- Slats pattern and benches inside Soul Sauna.

4- Soul Sauna with Blue Soul walls and benches and ceiling in Black Soul. The handle matches the colour of the internal cladding.

Functional design

The design by Starpool is the right balance between beauty and function. The resulting environment then fulfils not just the appearance, but also meets specific requirements both in terms of space and sustainability.

1. DOOR

Comfort, convenience and accessibility thanks to the door now increased in width to 87 cm.

2. LIGHTING

A cascade of indirect light naturally illuminates the inside, enhancing the natural effect of the materials. An even, diffused blaze, whose intensity can be regulated thanks to the white dimmable LED light bar installed on the back wall.

3 NATURAL AIR EXTRACTION

The system of natural air bottom-up extraction ensures continuous recirculation and clean air.

4. SUSPENDED BENCH

The suspended bench make cleaning operations easier.

5. SAFETY AND MONITORING

The oven is separated from the wooden structure thanks to a wall in gres porcelain or satin glass to protect it from the heat. Moreover, the pressure-activated safety system allows to fully disconnect the power supply if necessary.

6. SLIDING TECHNICAL COMPARTMENT

The sliding technical compartment, installable for cabins with a maximum dimension of 195x195 cm, allows to carry out all ordinary maintenance operations easily and independently. The technical compartment can also be remote, at a maximum distance of 10 metres from the cabin.

7. ALARM BUTTON

The alarm button inside the cabin stops all the functions and cuts the power supply, sending an alarm signal to the monitoring device.

CONVENIENCE

The installation is quick and safe and the product can be disassembled and assembled again elsewhere.

BE GREEN

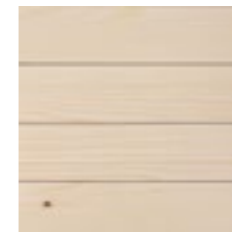

The Green Pack software for the **reduction of energy consumption** is a standard feature in Soul Sauna. It enables **power adjustment** when the set temperature is reached and **automatic door closing**. In addition, smart sensors stop heat production if the door remains open for a prolonged time, sending an alarm signal to the monitoring device.

Soul Steam Room

A multifaceted soul to a steam bath

Learn more about Soul Steam Room

SOUL STEAM ROOM

Soul Steam Room

A STEAM EMBRACE

Soul Steam Room is an evocative environment in **perfect urban style**. A solution of contemporary taste, where the **steam bath** is enhanced by the **showerhead**, for total well-being in an only environment.

An exclusive place, made even more elegant and original thanks to the **style details and the customisable embracing shades** lending an emotional feeling to it.

Thanks to its small dimension and to highly innovative technology, it suits every environment.

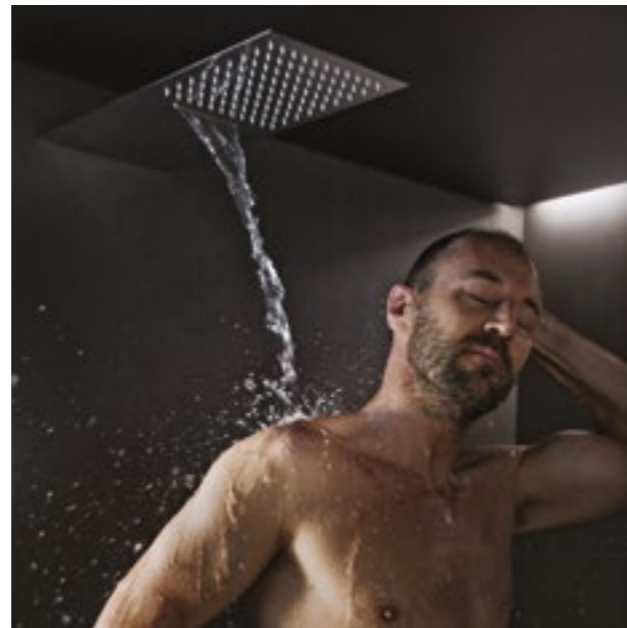

Design, technology and style for your wellness rituals

A product designed to offer exclusive moments of regeneration and relaxation thanks to an unprecedented choice of colours and advanced technology and performance.

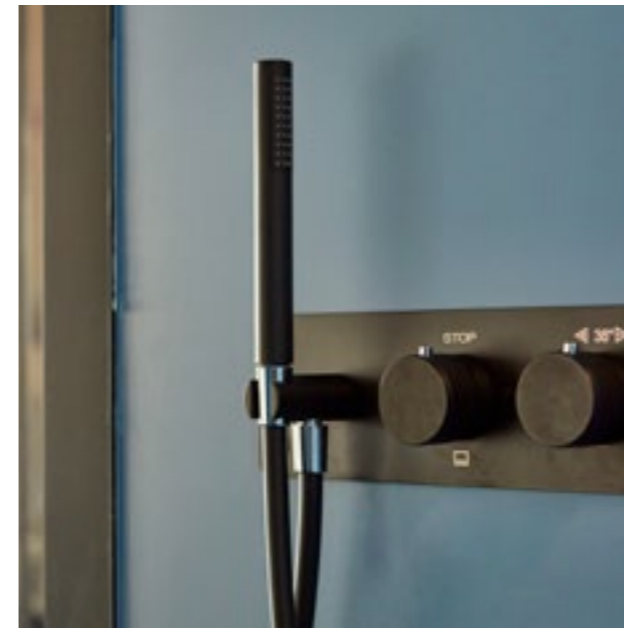

BENEFITS

Steam and scented fragrances combine and gently rest on the skin, making natural exfoliation easier and promoting the elimination of skin impurities. The temperature of 45°C and the humidity rate of 98% help to strengthen the defences of the upper respiratory tract.

SHOWER AND WATER BLADE

The open-air-rain effect of the shower turns a simple moment dedicated to self-care into an experience that involves all senses. Thanks to the mixer that regulates the temperature, the water blade goes from being a warm and vigorous neck massage to becoming a water fall – especially indicated to refresh the body during the session inside the steam bath.

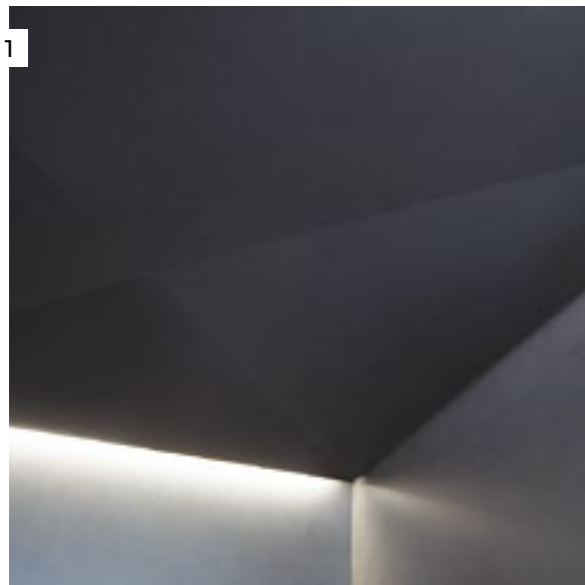

WATER FITTINGS

An only solution that includes mixer to control water temperature hot and cold water and diverter to activate the wall-mounted handshower, the showerhead or the water blade. All the fittings are realised according to our exclusive design and ergonomic shapes. The handles have a distinct texture that ensures better grip.

COLOURS

Soul Steam Room wears unique colours, acquiring a remarkable emotional impact. Shades become perfect cut-to-measure garments decorating the walls with elegance. The unprecedented colour options pave the way for complete product customization, without any limit in terms of shades.

1- The ceiling of Soul Steam Room is inspired by the comfortable and soft lines of a sofa.

2- Suspended bench of Soul Steam Room.

3- Detail of the water fittings of Soul Steam Room created by designer Cristiano Mino.

4- Soul Steam Room in the Grey Matt version.

Functional design

The design by Starpool is the right balance between beauty and function. The resulting environment then fulfils not just the appearance, but also meets specific requirements both in terms of space and sustainability.

1. DOOR

Comfort, convenience and accessibility thanks to the door now increased in width to 87 cm.

2. LIGHTING

A cascade of indirect light naturally illuminates the inside, enhancing the soft effect of the materials. An even, diffused blaze, whose intensity can be regulated thanks to the white dimmable LED light bar installed on the back wall.

3. NO GROUTING

With less than 1% of the gres porcelain or satin glass surface is grouted, Soul Steam Room is the product that offers the best level of hygiene.

4. BENCH

The suspended bench removed from the wall makes cleaning operations easier, preventing water stagnation. Its cladding is in anti-bacterial material that is easy to sanitise.

5. SHOWER / WATER BLADE / HANDSHOWER

An only solution that includes mixer to control water temperature and diverter to activate the wall-mounted handshower, the showerhead or the water blade.

6. SLIDING TECHNICAL COMPARTMENT

The sliding technical compartment, installable for cabins with a maximum dimension of 195x195 cm, allows to carry out all ordinary maintenance operations easily and independently. The technical compartment can also be remote, at a maximum distance of 10 metres from the cabin.

7. ALARM BUTTON

The alarm button inside the cabin stops all the functions and cuts the power supply, sending an alarm signal to the monitoring device.

8. FRAME

The front wall is surrounded by an elegant 3-cm-thick frame in Solid Surface.

CONVENIENCE

The installation is quick and safe and the product can be disassembled and assembled again elsewhere.

BE GREEN

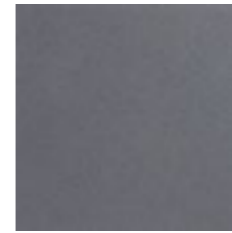

The Green Pack software for the **reduction of energy consumption** is a standard feature in Soul Steam Room. It enables **power adjustment** when the set temperature is reached and **automatic door closing**. In addition, smart sensors stop heat production if the door remains open for a prolonged time, sending an alarm signal to the monitoring device.

Soul Shower

The pleasure of daily well-being

Learn more about Soul Shower

SOUL SHOWER

Soul Shower

THE REGENERATING POWER OF WATER

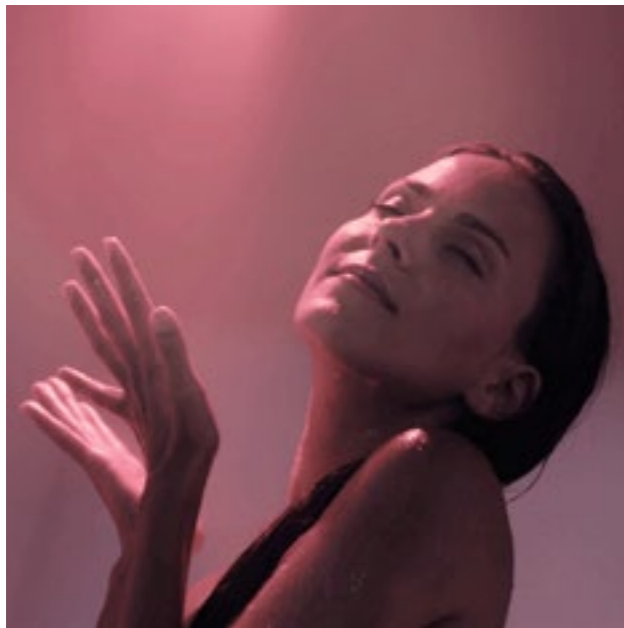

Soul Shower **transforms a shower in a cosy and comfortable environment** where you can let yourself be embraced by all the sensations that only water can give. A unique product that combines modern design and Nordic tradition. Its **elegant lines and fine shades blend** perfectly in any environment, enhancing its appearance.

Soul Shower offers an experience of **authentic well-being**, where you can also adjust the water temperature according to your needs. The wide jet that embraces the body and the sound of water create a regenerating atmosphere, where a simple shower becomes an actual **sensory ritual**.

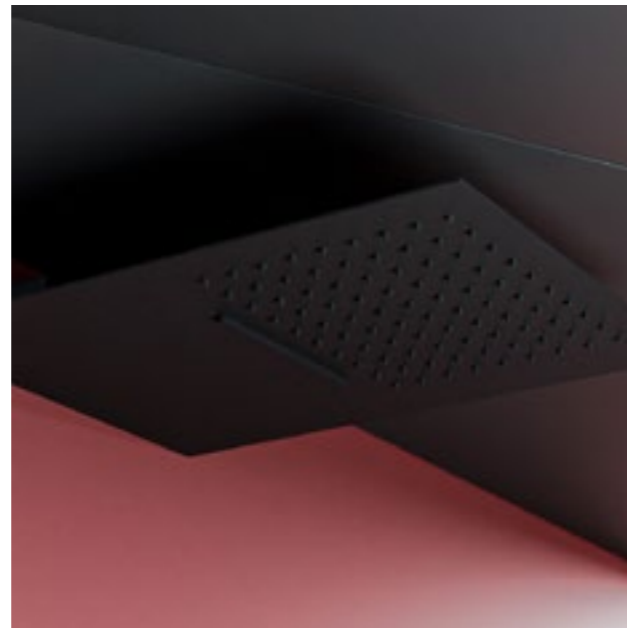

Complete your wellness

A unique product that encloses the pleasant sensations of water and lends a new personality to the surrounding space.

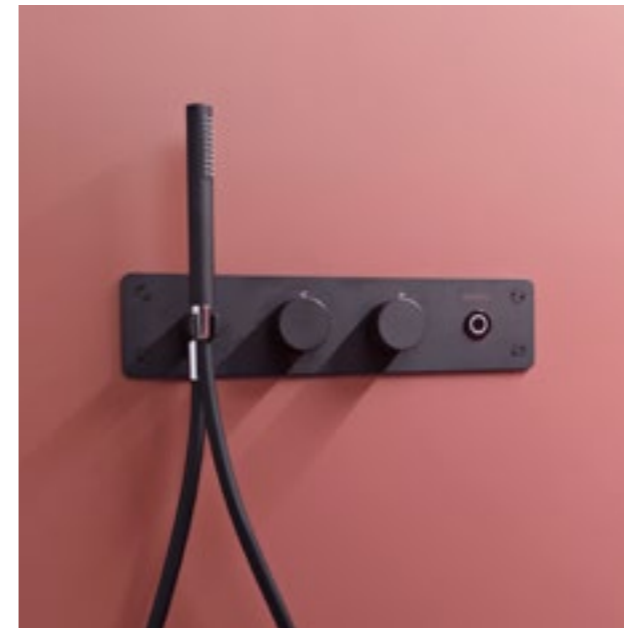

BENEFITS

Soul Shower ensures the recovery of physical balance thanks to various cold reactions. This is possible thanks to the jet intensity and the water temperature, which can be adjusted to specific individual needs.

SHOWER AND WATER BLADE

The open-air-rain effect of the shower turns a simple moment dedicated to self-care into an experience that involves all senses. Thanks to the mixer that regulates the temperature, the water blade goes from being a warm and vigorous neck massage to becoming a regenerating water fall.

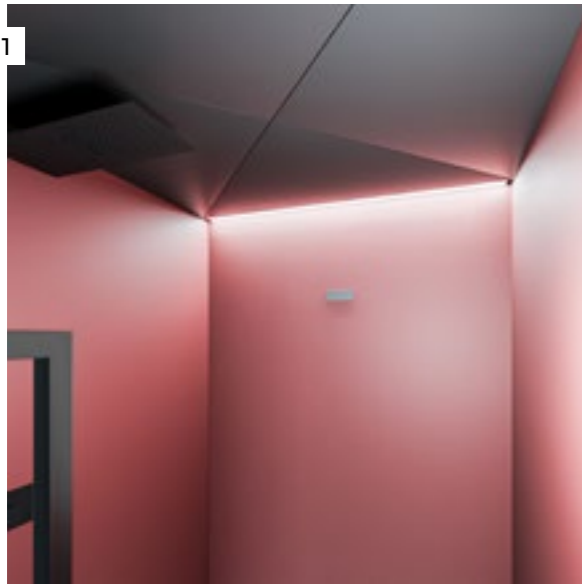

WATER FITTINGS

An only solution that includes mixer to control water temperature hot and cold water and diverter to activate the handshower or shower head. All the fittings are realised according to our exclusive design and ergonomic shapes. The handles have a knurling texture that ensures better grip.

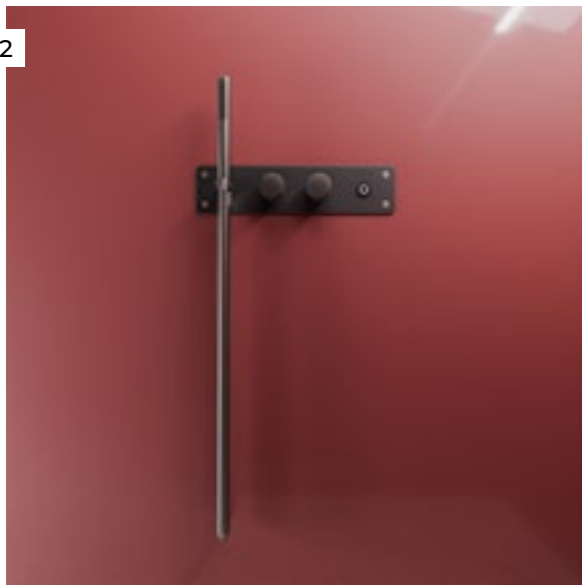

COLOURS

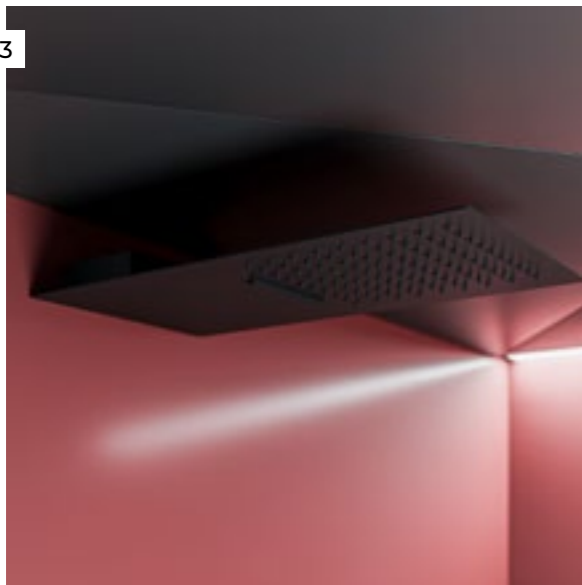

Soul Shower wears unique colours, acquiring a remarkable emotional impact. Shades become perfect cut-to-measure garments decorating the walls with elegance. The unprecedented colour options pave the way for complete product customization, without any limit in terms of shades.

1- The ceiling of Soul Shower is characterised by soft and elegant lines.

2- Detail of the water fittings of Soul Shower created by designer Cristiano Mino.

3- The showerhead has an open-air-rain effect that ensures a unique sensory experience.

4- Soul Shower in the Purple Soul version.

*The
sustainable
Spa*

Smart Technology

Sustainable products and technologically performing systems contribute to defining the quality standard of each activity.

Control Unit and Eco Spa Technology are the software solutions that we propose to **reduce our products' energy consumption**, as well as improve and automate their functions. Technology in the service of our clients to increase connectivity to a computer network which is more and more sophisticated and, at the same time, user- easy.

The remote **management** of our every realisation, ranging from the room temperature parameters to the scheduling of the switching on and off of the cabin, **as well as predictive maintenance**, ensure **constant consumption monitoring and optimization of operating costs**.

To make wellness more and more accessible and smart.

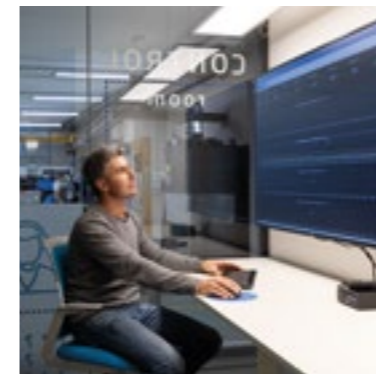

Discover more on our technological solutions and innovations

GREEN PACK

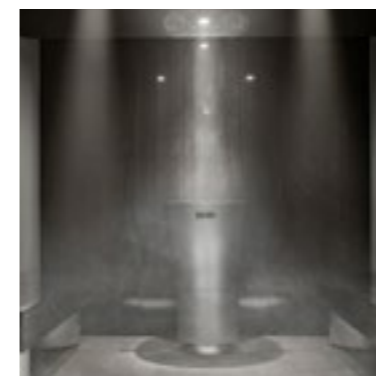

This software allows to **reduce energy consumption** thanks to **smart sensors** that stop the production of steam and heat if in case the door remains open for a prolonged time, through an alarm signal from the product control device.

In addition, it features a **power adjustment** function when the set temperature is reached and a self-closing door.

SIM 4.0

It is a subscription software that allows for **the remote management** of the spa. Thanks to a dashboard, Sim 4.0 allows to view the main **parameters of the equipment**: consumption, entries and anomalies. As an extra service, thanks to our **Business Intelligence**, it is also possible to receive a **three-monthly report** to make the spa management easier. A **remote support service** is also available upon request to reduce the intervention time and costs.

DEEP CLEAN

The software generates **programmable cycles** of thermal shock to achieve **over 95% disinfection**.

This process involves a forced temperature increase in the cabins, thus eliminating impurities and pathogens.
